APR - 3 2006

Federal Communications Commission
Office of the Secretary

I am opposed to the use of cell phones on airplanes. Not only is there a possibility of interference with the GPS according to research at Carnegie Mellon University, but it will also be a significant annoyance for other passengers on the flight. Cell phone conversations are different in tone and volume than the conversations between people seated next to each other on a flight.

Please do not allow cell phone calls on airplanes.
Thank you,
Barbara Shema

John Tuttle (jtcolumbo@yahoo.com) writes:

Dear Sir:

Regarding proposals by special interest groups to allow cell phone use on commercial airliners during flights, such use of cell phones should not be allowed in cabins. Such use would be a distraction to flyers who wish some peace and quiet during their flights, which outweighs any benefit to cell phone callers and their providers. It would be bad public policy to change the current prohibition against portable cell phone use during domestic U.S. flights. Thank you.

PLEASE do NOT allow the use of cell phones on commercial airliners! People are rude with these things and we are crowded into a plane and forced to listen to someone else's mostly unnecessary telephone conversation.

PLEASE SPARE US!

FCC Commissioners:

I am writing to register my complaint about proposed phones in the air. As a consumer and airline passenger I am horrified that you are considering cell phone service in planes. From all recent reports and informal surveys the general public does not want this, not only for safety reasons, which are of paramount concern, of course, but also because no one wants a talker in the next seat. The world is too full of babble already, and this would make a plane ride very unpleasant for other passengers. I'm sure it can't be necessary during a flight. I hope you will carefully consider all the ramifications of this matter.

Thank you for your attention.

Please, do what you can to prevent cell phone usage on airplanes. Using them on airplanes are sure to cause much frustration and likely problems amongst the passengers.
This idea is outrageous.

Subject: Wireless Phones On Planes

RECEIVED

APR - 3 2006

Federal Communications Commission
Office of the Secretary

Hello Sir:

I just read on the AOL news that wireless phones should be available in the near future on airlines. I cannot stress enough to you how dangerous this will be, if allowed. Do you realized that most people have no idea about the rules of telephone etiquette....talking loudly, arguing, conducting business, etc.? I just can't imagine flying in peace with this technology becoming available on flights. Passengers have already given up comfort, traveling with rude, boorish passengers and now we will have to deal with them yacking on phones? This will be a HUGE mistake, a step BACKWARDS. It's like comparing cell phone use to smoking. If it is allowed, I'm sure in several years, it will be made illegal, due to all the frustration it will cause and I'm not even considering potential dangers with terrorists. Already, cell phones can be used to denonate bombs. PLEASE, do not allow cell phones on flights!!!

Sincerely,
Henry Payne

Subject: IN-flight cell phone use

RECEIVED

APR - 3 2006

Federal Communications Commission
Office of the Secretary

Dear Commissioners,

Just reading about in-flight cell phone use angers me. Safety concerns aside, I don't believe I should be subjected to cell phone conversations from the passenger beside me, in front of me or behind me. It's bad enough that we are packed into rows and have to perform simple gymnastics to exit the row during a flight to use the restroom or stretch our legs. Now, I may be subjected to my row neighbor making a cell phone call or two or three in addition to being packed next to them in small seats.

Will I have the ability to ask for another seat assignment? Probably not. Cell phones are a convenience, and allowing their use on planes for someone's convenience will lead to angry neighbors and unnecessary additional in-flight stress.

Please do not allow in-flight cell phone use.

Sincerely,
Joseph Munoz

To: Jonathan Adelstein
Subject: Please don't allow cell phone use on planes

RECEIVED

APR - 3 2006

Federal Communications Commission
Office of the Secretary

Mr. Adelstein:

PLEASE do not allow cell phone use on airplanes. It is more than annoying, even on the ground for those 10 or 20 minutes pre-flight, to be seated next to someone who speaks loudly on the phone. I have no place to go to escape the rudeness.

I fly over 100 flight segments per year and generally a bit more than 90,000 to 100,000 miles per year. No cell phone talk is one of the few benefits of today's inflight experience. Please don't change that.

And I can only imagine the air-rage when many people are talking for the long periods in flight.

Please.....do not allow cell phones on flight.

Thank you,

--Jim Newell

I just read an article about how we are probably within a year of being able to use cell phones on airplanes. I don't care if it safe to do so, please don't approve such a measure. It is bad enough that we put up with drivers on cell phones who don't concentrate on their driving, people in restaurants who disrupt others' meals while making cell phone calls and cell phone users in airports, shopping malls and everywhere who are loud, rude and disruptive. I cannot imagine sitting next to someone on a plane who is on their cell phone. Let's keep the skies quiet. Please!!!.

Dear Commissioners:

The Wall Street Journal today reported that technology will soon become available that will make in-flight cell phone use safe and practical. With the greatest respect, I urge you to reject changes in current regulations that prohibit such use of cell phones. Currently, the airplane is one of the few safe havens from the highly intrusive chatter of addictive cell phone users. Please protect us from this invasion into one of our last quiet sanctuaries.

Most sincerely,

Ellen A. Gordesky

My name is Paula Daley. I fly occasionally--just like millions of other Americans do everyday. I read recently that your office may agree to allow people to use their cell phones on flights.

I am writing to let you know that I cannot think of a worse situation should you allow this. As it is, we are unindated with cell phone useage disrupting our dinners in restaurants, meetings, and on and on but at least we can get up and leave.

Can you imagine being stuck on a plane for 3 hours or more with a person talking loudly on their cell phone the whole time---along with others doing the same thing?

Not only that, airline personnel have enough to contend with without having irate people on the plane arguing about the usage of cell phones on the plane!

I cannot believe you are even considering this! Please re-consider any decision you may make allowing people to use the cell phones on the planes.

Thank you for your time.

Regards,
Paula Daley

P.S. I am not against cell phones--I use them heavily in my profession ---but please not on the planes.

Today news hit that your commission is allowing cell phones on airlines in flight, are you nuts. I don't have to pay to listen to some idiot talking without regard for others, now multiply that by more idiots at the same time talking non-stop. Where is our common sense for a potentially dangerous situation in a confined space. what about security and the flexibility provided to those who want to harm our nation. A condition should be of the airlines if they feel its such a nifty idea, to create sound proof cell phone booths like lavatories. All in all its a huge mistake and I believe you should hold open public forums thru out our country not just in Washington. to really gage public opinon . Thanks lets get this right before we have a real disaster on our hands. Larry kimmelman lbhsny54@aol.com

I am writing to express what is apparently a popular opinion, if the aol poll is any indication. I am asking that the use of cell phones and wireless internet continue to be forbidden in air.

If these devices interfere with the GPS system, why would you allow it? Also, think about the person who is already extremely nervous to fly, or maybe trying to rest - people travel for lots of reasons - maybe someone has had a death in the family - and there are 50 loud phone conversations taking place all around them. It sounds like chaos!

I wonder what the noise decibal would be? It is already probably just about unacceptable just from the plane noise.

I am also wondering about security issues, or fear of security issues.

Thank you,

Tammie Manfull
